

## Workday Positioned as a Leader in SaaS Human Resource Management Systems Report

PLEASANTON, CA--(Marketwired - Aug 29, 2017) - [Workday, Inc.](#) (NYSE: WDAY), a leader in enterprise cloud applications for [finance](#) and [human resources](#), today announced it has been positioned as a leader in "[The Forrester Wave\(TM\): SaaS Human Resource Management Systems, Q3 2017](#)," a new report published by Forrester Research, Inc. Workday received the highest score in the strategy category and earned the highest possible scores in 16 criteria, including business vision, usability, and mobile.

According to the report, "In addition to its prominent HCM brand reputation, Workday articulates a clear vision for the transformational value of the HR function and an innovative technology vision based on business flexibility, advanced analytics and UX, and a unified platform." Forrester also states, "Workday HCM is a good fit for large to very large multinational companies, especially those with an agenda to elevate the value of HR and improve the employee experience. It is also a good fit for midsize companies that have relatively sophisticated HR processes."(1)

[Workday](#) was built based on the vision that the cloud was a far superior choice for customers over on-premise HR systems -- with one version of software, one customer community, one codeline, and a single security model and user experience. This concept of the power of one makes it possible for Workday to deliver new innovations to customers more continuously, meaning they are always on the latest, most up-to-date version -- with more than 70 percent of Workday customers live and a customer satisfaction rating over 95 percent.

Since its inception, Workday's product team has relied on close relationships with customers to build the kind of products that will not only meet, but exceed customer needs and transform the way they work. As a result, two new offerings were made available in the last year that seamlessly connect with and extend the power of the company's flagship HR system -- [Workday Human Capital Management \(HCM\)](#) -- to drive employee engagement, strategic decisions, and business growth. [Workday Learning](#) is an application that offers a personalized, social, and interactive learning experience for organizations to encourage career development at every stage of the employee journey, and [Workday Planning](#) is the first planning, budgeting, and forecasting application that unifies financial and workforce planning with analytics and transactions in one system.

### Comment on the News

"We consider Forrester's recognition of Workday as a leader a result of our unyielding commitment to delivering the cloud HCM technology and experiences that drive customer success," said Cristina Goldt, vice president, HCM products, Workday. "We will continue to partner closely with our customers to provide the capabilities they need to keep pace in a dynamic business environment -- now and into the future."
